Re: Senior Front-end Engineer, Harbourside Health

Dear Hiring Manager,

I'm applying for the Senior Front-end Engineer role at Harbourside Health. I've built web applications in React for eight years, most recently at Acme Lending, where I led the React rebuild of the loan portal.

Your ad asks for accessibility in practice. At Acme Lending I added automated accessibility checks with axe to our CI pipeline, and I worked with our designers on a shared component library in Storybook.

I enjoy helping other engineers grow: I mentored two graduate engineers at Acme Lending. At Globex Insurance I built the online claims form and wrote unit tests with Jest for the quote calculator.

I haven't worked in healthcare yet; my experience is in lending and insurance. I'd welcome the chance to talk about the role.

Kind regards,
Jane Citizen
